Silver Street Reconstruction

Project Update July 28, 2014 to August 8, 2014

Upcoming Work

General:

• The Contractor will begin mobilizing equipment and materials to the site

Drain:

- Begin work on the rain garden in front of the Woodman Park Elementary School
- Begin drainage improvements along Spaulding Turnpike on-ramp

Water:

• Begin improvements to transmission main in the Spaulding Turnpike Area and around the pedestrian tunnel

Roadway Reconstruction:

• None anticipated

Sidewalks and Curbing:

• None anticipated

Water and Sewer Service Interruptions

At this time there are no water main shut downs scheduled. However, interruptions in water service will be required to complete proposed transmission mains. Residents affected by water main shut downs (interruption in water service) will be notified 48 hours in advance via a City of Dover hanger notification on exterior door knobs.

Traffic Patterns

Road Closures: Road Closures are not anticipated. Generally roads will be open to two-way traffic with travel lanes shifting as required to facilitate the Contractor's operations. On occasion, one-lane alternating traffic will be required. Traffic delays can be expected and it is recommended that motorists seek alternate routes

<u>Parking</u>: Please be aware of NO PARKING signs that may be erected within or adjacent to the working areas. No parking times will be from 6:30am – 6pm, Monday thru Friday. Barricades will be placed on a daily basis as needed by the contractor, but please be alert to material and equipment stored on the side of roads.

Pedestrian Tunnel: It is anticipated the pedestrian tunnel and sidewalks from Silver Street Ext and the Old Littleworth Road will not be accessible while work is being completed in this area. It is recommended that residents who frequently use the tunnel make alternate arrangements while this work is taking place. This area will experience limited access for a minimum of 2 weeks.

General Notes

If you have any questions or concerns, please contact David White, P.E., City Engineer at 516-6450
