Hi Jim,

Here is the email and the list of questions I referred to. I'll look into our schedules and try to set up a call likely for next Wednesday.

Best,

Michael

Subject: Science meeting

Hi Clark

I have conflicts on the proposed meeting dates tfor the Science discussion but am trying to move one commitment on November 9th to free that day up.

The Coalition has put together a list of questions that we feel is important for Jim Latimer to address at the meeting since EPA is heavily relying on his report. We want to provide him the questions ahead of the meeting so he has an opportunity to see them and be prepared to respond so it can be a productive exchange at the meeting. At the meeting the Coalition requested the back up data used to calculate the nutrient load reductions presented and the assumption used. EPA expressed their willingness to provide the information and said that Michael Cobb would send it so the Coalition could review it. To date we have not received anything.

Thank you.
